Licensing of Centrex[®] Weatherable Polymers to Diamond Polymers

Dear INEOS ABS Customer,

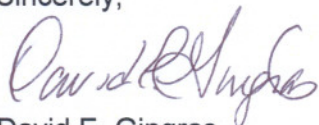

Effective December 31, 2008, INEOS ABS (USA) Corporation is discontinuing the manufacture and sale of all grades of Centrex weatherable polymers. Concurrent with this discontinuation, INEOS ABS has entered into a licensing agreement with Diamond Polymers, Inc. of Akron, Ohio. Diamond Polymers was founded in 1988 to produce ABS and ASA polymers to meet the stringent performance requirements for demanding customers. If you are not familiar with Diamond Polymers, you may want to visit their website at www.diamondpolymers.com.

Under the terms of the licensing agreement, INEOS ABS will retain ownership of the Centrex trademark and Diamond Polymers will be licensed to manufacture and sell the Centrex portfolio utilizing INEOS ABS technology and formulations.

We value your business and are jointly committed to affect a seamless transition from INEOS ABS to Diamond Polymers with an uninterrupted supply of Centrex. Shortly you will be contacted by both your INEOS ABS and Diamond Polymers sales representatives to discuss a transition plan

On behalf of INEOS ABS we thank you for your business over the past 20 plus years. On behalf of Diamond Polymers we look forward to a new and lasting relationship.

Sincerely,

David E. Gingras
Vice President, NAFTA
